

ALBPLATZ

ABOUT THE PROJECT

The building complex Albplatz was constructed in 1995 and is situated in a strategically excellent location on one of the arterial roads in Stuttgart. With its high-quality and timeless architecture the property is a significant landmark building at the gateway to Central Stuttgart. The efficient building structure enables the realization of a variety of attractive office concepts. In addition, structural optimization, multi area configuration and the overall design enhancement of the property provide medium-term value creation potential.
